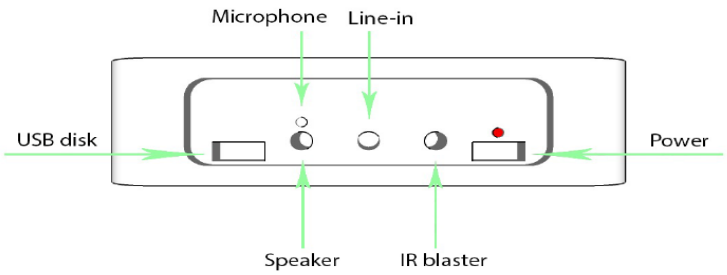
KOOLTECHS

KoolBridge QuickStart

REGISTRATION (Required)

1. Register your account: Go to http://apps.kooltechs.com/user/tabs/2
2. Go to your confirmation email to activate your account.

CONFIGURE KOOLBRIDGE



1. Plug in power cord.
2. Plug in Sound System, Speaker or Headphone into the Speaker jack (Line out).
3. When you hear "***Welcome to KoolBridge Configuration Mode***", go to your Phone Settings > Wifi > select "KoolBridgeAP".
4. Once the KoolBridge Wifi signal is established (Symbol seen at the top), open a browser on your phone, enter **192.168.0.1** or **kooltechs.com** > submit.
5. Enter your Home Network SSDI (Network name, ex. "DLink ") and Wifi password (leave empty if no password required)
6. Wait for 1-2 minutes until you hear: "***Welcome to KoolBridge Smart Home Platform***". KoolBridge is now connected to your house Wifi network.
7. **Download** an open **KoolApp** on your phone.

KOOLBRIDGE FUNCTIONS When You Are at HOME

KoolApp Home Screen > Rotate Wheel to "Home" > Tap "At home"

1. ***Use KoolBridge as 2 way Baby monitor*** **:** Tap "Baby Monitor" > KoolBridge now acts as audio monitor, transmitting recorded sound to your phone.

   Press and hold Microphone to speak and your voice will be heard on the headphone/speaker/sound system connected to the KoolBridge.

2. ***Use Audio Review with ease***: Tap "Audio Review with ease", Plug any audio source (TV, ipod touch, radio ....) **line out** to KoolBridge **line in** > Tap Play and adjust the speed to slow down or speed up the audio.

3. ***Turn On/ Off Sound detection Notification***: Tap Setting > Tap Sound Alarm "**on**" or "**off**": *When sound is detected by KoolBridge, your phone gets Ringtone/ Notification if Sound Alarm is turned "**on**".*

4. *Add a KoolWand to work with KoolBridge:* Place a fresh, unconnected KoolWand next to KoolBridge > KoolApp Home Screen > Tap "At Home" > Setting > Sound alarm "**on**" > > select an object to attach KoolWand to: ex. "Gun" > enter name/ type of Gun: ex. "Hand gun" > ok :

*When the **Gun with attached KoolWand** is **moved**, your phone gets **Ringtone/Notification** via the internet regardless of where you are in the world .*

Note: To Refresh/ Delete previously assigned functions on KoolWand: Press Right Button on KoolWand 6 times consecutively in 3 sec. The LED light flashes Red once at completion.

5. *Use KoolWand as "Remote" for Voice command: Turn on the Phone Bluetooth, connect to KoolBlue.*

a. Using fresh (unconnected) KoolWand: KoolApp Home Screen > Tap "At Home" > Setting > Sound Alarm on > > select Remote > enter name, ex. "Voice command Remote " > ok

b. *Using KoolWand that is already assigned a function, ex. "Gun", Change Function to "Remote"* :

KoolApp Home Screen > Tap "At Home" > > > > enter name, ex. "Voice command Remote" > ok > Go to Phone setting > Bluetooth On > KoolBlue > "Connected".

***# Siri of iPhone*:**

Press Right button on KoolWand to control Siri on iPhone. (speak into Koolbridge)

 # Google Voice of KoolBridge:

Press Left button on KoolWand to Google Voice KoolBridge (speak into Koolbridge: ex. Play Song "HERO"). Press Left button again to complete command. Attach your music collection on a USB flash drive to the micro USB slot labeled "USB disk" on Koolbridge via an optional "USB-Micro USB adaptor".

6. *Play Music Wirelessly on your Sound System:*

a. ***Via* Bluetooth**: Phone Settings > Bluetooth "on" > **KoolBlue** > connected.

The *Music on your Phone* can now be streamed onto *Any Sound System* connected to the Koolbridge Speaker Line out (including the sound system in your car!)

b. ***Via* Home Wifi Network:** Download an UPnP/ DLNA home media streaming app such as **ArkMC** (iOS & Android) or **Skifta** (Android: http://apps.kooltechs.com/libraries/apps/com.skifta.android.app.apk) on your phone to stream music from your phone onto *Any Sound System* connected to the Koolbridge Speaker Line out.

KOOLBRIDGE FUNCTIONS When You Are AWAY FROM HOME

1. ***Auto-Accept FaceTime Call (Instant Security camera to check on Kids, Pets, house) :***
   a. KoolApp Home Screen > Away from Home > Login > **Enable FaceTime** ON
   b. Connect the "extra iDevice" at home to KoolBridge via Bluetooth: Settings (in extra iDevice) > Bluetooth "on" > KoolBlue > connected: *Koolbridge now auto-accept any FaceTime call received on the "extra iDevice" at home.*
2. ***Get Notification for noise detection or any event at home that was triggered by the previously added KoolWand:***

   KoolApp Home Screen > Away from Home > Login > Select **Ringtone/ Notification "on"** :
   You get notification to your SmartPhone when KoolWand is moved or displaced too far from Koolbridge (Attach KoolWand to a Door or Valuable for Security/Theft Prevention), when Noise is detected (Security), or when KoolWand is ***not*** moved at scheduled time (Attach KoolWand to the Pill Box to track Medication compliance.)
